Product Review Reminder Extension for Magento 2

1. **Installation**

   - Get Product review reminder extension from Milople Magento 2 extension store
   - Unzip the extension and copy the folder structure in your store.
   - Create a directory called "code" if you are installing the first extension inside the "app" directory then create the "Milople" directory inside the code and paste the folder structure from the module to that directory

   So, your folder structure will be like following:

   ```
   app/code/Milople
   ```

   **a. Activation**

   Open a command line in folder root of Magento and run the following commands via SSH using putty or others,

   ```
   php bin/magento module:enable Milople_All
   php bin/magento module:enable Milople_ProductReviewReminder
   php bin/magento setup:upgrade
   ```

2. **Uninstallation and urgent deactivation**

   **a. Deactivate module using command**

   Open the command line in the root of Magento and run the following commands via SSH using putty or others.
php bin/magento module:disable Milope_ProductReviewReminder php
bin/magento module:disable Milope_All

b. **Deactivate module using config.php**

Open the following file: `app/etc/config.php`

Replace 1 with 0 value in front of the following lines.

```
'Milope_All' => 0
'Milope_ProductReviewReminder' => 0
```

c. **Update the database**

Open the command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento setup:upgrade
```

3. **Remove an extension from your store permanently**

a. **Deactivate module using command**

Open the command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento module:disable Milope_ProductReviewReminder php
bin/magento module:disable Milope_All
```

b. **Delete the below-mentioned folders and files**
c. Update the database

Open the command line in the root of Magento and run the following command via SSH using putty or others.

```bash
php bin/magento setup:upgrade
```

✔ Refresh the cache from the admin panel

✔ If you find something wrong and are unable to access the Admin Panel, then delete the following folders from your Magento store.

```
var/cache
var/session
```

✔ If you want to refresh Cache via SSH

✔ Open the command line in the root of Magento and run the following commands via SSH using putty or others.

```bash
php bin/magento cache:clean
bin/magento cache:flush
```
