

# GeoIP Extension for Magento 2

## 1. Installation

- Get the GeoIP from Milople Magento 2 extension store.
- Unzip the extension and copy the folder structure in your store.
- Create a directory called "code" if you are installing the first extension inside the "app" directory then create the "Milople" directory inside the code and paste the folder structure from the module to that directory.
- So, your folder structure will be like following

```
app/code/Milople
```

### A. Activation

- Open command line in folder root of Magento and run following commands via SSH using putty or others,

```
php bin/magento setup:upgrade
```

## 2. Uninstallation and urgent deactivation

### A. Deactivate Module using command

- Open the command line in the root of Magento and run the following commands via SSH using putty or others.

```
php bin/magento module:disable Milople_Geoip  
php bin/magento module:disable Milople_All
```

### B. Deactivate Module using config.php

- Open the following file:

```
app/etc/config.php
```

- Replace 1 with 0 value in front of the following lines.

```
'Milople_All' => 0,  
'Milople_Geoip' => 0,
```

## Update the database

- Open the command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento setup:upgrade
```

## 3. Remove Extension from your store permanently

### A. Deactivate Module

- Open the command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento module:disable Milople_Geoip  
php bin/magento module:disable Milople_All
```

### B. Delete the following folders and files

```
app/code/Milople/Geoip  
app/code/Milople/All
```

### C. Update the database

- Open the command line in the root of Magento and run the following command via SSH using putty or others.

```
magento setup:upgrade
```

- Refresh the cache from the admin panel.

- If you find something wrong and are unable to access the Admin Panel, then delete the following folders from your Magento store.

var/cache  
var/session

- If you want to refresh Cache via SSH.
- Open the command line in the root of Magento and run the following commands via SSH using putty or others.

magento cache:clean  
magento cache:flush
