

Stripe Payments M2

Installation

Get Stripe Payments extension from Milople
Magento 2 extension store

Unzip the extension and copy the folder structure in your store.
Create directory called "code" if you are installing first extension
inside the "app" directory then create "Milople" directory inside the
code and paste the folder structure from module to that directory
So, your folder structure will be like following

```
app/code/Milople
```

Activation

open command line in folder root of Magento and run following
commands via SSH using putty or others,

If you want to use 'authorize.net direct post' of default Magento.

This command is necessary to execute.

```
composer require stripe/stripe-php  
php bin/magento setup:upgrade
```

Uninstallation and urgent deactivation

1. Deactivate Module using command

Open command line in root of Magento and run following
commands via SSH using putty or others.

```
php bin/magento module:disable Milople_Stripe
```

2. Deactivate Module using config.php

- Open following file:
- app/etc/config.php
- Replace **1** with **0** value in front of the following lines.
'Milople_Stripe' => 0

Update the database

Open command line in root of Magento and run following command via SSH using putty or others.

```
magento setup:upgrade
```

Remove Extension from your store Permanently

Deactivate Module

Open command line in root of Magento and run following command via SSH using putty or others.

```
php bin/magento module:disable:
```

```
php bin/magento module:disable Milople_Stripe
```
