Product Label Extension for Magento 2

1. Installation

- Get Product Label extension from Milople Magento 2 extension store
- Unzip the extension and copy the folder structure in your store.
- Create a directory called "code" if you are installing the first extension inside the "app" directory then create the "Milople" directory inside the code and paste the folder structure from the module to that directory

So, your folder structure will be like following:

app/code/Milople

a. Activation

open a command line in the folder root of Magento and run the following commands via SSH using putty or others,

```
php bin/magento module:enable Milople_All
php bin/magento module:enable Milople_ProductLabels
php bin/magento setup:upgrade
```

2. Uninstallation and urgent deactivation

a. Deactivate module using command

Open the command line in the root of Magento and run the following commands via SSH using putty or others.
php bin/magento module:disable
Milople_ProductLabels php
bin/magento module:disable
Milople_All

b. Deactivate module using config.php
Open the following file: app/etc/config.php

Replace 1 with 0 value in front of the following lines.

'Milople_All' => 0
'Milople_ProductLabels' => 0

c. Update the database
Open the command line in the root of Magento and run the following command via SSH using putty or others.

php bin/magento setup:upgrade

3. Remove an extension from your store permanently

a. Deactivate module using command
Open the command line in the root of Magento and run the following command via SSH using putty or others.

php bin/magento module:disable
Milople_ProductLabels php
bin/magento module:disable
Milople_All

b. Delete the below-mentioned folders and files
c. Update the database

Open the command line in the root of Magento and run the following command via SSH using putty or others.

```shell
php bin/magento setup:upgrade
```

✔ Refresh the cache from the admin panel
✔ If you find something wrong and are unable to access the Admin Panel, then delete the following folders from your Magento store.

```
var/cache
var/session
```

✔ If you want to refresh Cache via SSH

✔ Open the command line in the root of Magento and run the following commands via SSH using putty or others.

```shell
php bin/magento cache:clean
bin/magento cache:flush
```
