1. **Installation**

- Get Magpie Payment Gateway extension from Milople Magento 2 extension store
- Unzip the extension and copy the folder structure in your store.
- Create directory called "code" if you are installing first extension inside the "app" directory then create "Milople" directory inside the code and paste the folder structure from module to that directory

So, your folder structure will be like following

```
app/code/Milople
```

**a. Activation**

Open command line in folder root of Magento and run following commands via SSH using putty or others,

```
composer require flairlabs/magpie-php-sdk
```

```
php bin/magento setup:upgrade
```

2. **Uninstallation and urgent deactivation**

**a. Deactivate module using command**

Open command line in root of Magento and run following commands via SSH using putty or others.

```
php bin/magento module:disable Milople_Magpie
```

```
php bin/magento module:disable Milople_All
```

**b. Deactivate module using config.php**

Open following file: `app/etc/config.php`

Replace 1 with 0 value in front of the following lines.

```
'Milople_All' => 0
'Milople_Magpie' => 0
```

**c. Update the database**

Open command line in root of Magento and run following command via SSH using putty or others.

```
php bin/magento setup:upgrade
```
3. **Remove extension from your store permanently**
   a. **Deactivate module using command**

   Open command line in root of Magento and run following command via SSH using putty or others.

   ```
   php bin/magento module:disable Milople_Magpie
   php bin/magento module:disable Milople_All
   ```

   b. **Delete the below mentioned folders and files**

   ```
   app/code/Milople/Magpie
   app/code/Milople/All
   ```

   c. **Update the database**

   Open command line in root of Magento and run following command via SSH using putty or others.

   ```
   php bin/magento setup:upgrade
   ```

   ✓ Refresh the cache from admin panel
   ✓ If you find something wrong and unable to access the Admin Panel, then delete the following folders from your Magento store.

   ```
   var/cache
   var/session
   ```

   ✓ If you want to refresh Cache via SSH
   ✓ Open command line in root of Magento and run following commands via SSH using putty or others.

   ```
   php bin/magento cache:clean
   php bin/magento cache:flush
   ```
