1. <u>Installation</u>

- Get Magpie Payment Gateway extension from Milople Magento 2 extension store
- Unzip the extension and copy the folder structure in your store.
- Create directory called "code" if you are installing first extension inside the "app" directory then create "Milople" directory inside the code and paste the folder structure from module to that directory

So, your folder structure will be like following
app/code/Milople

a. Activation

open command line in folder root of Magento and run following commands via SSH using putty or others,

```
composer require flairlabs/magpie-php-sdk

php bin/magento setup:upgrade
```

2. <u>Uninstallation and urgent deactivation</u>

a. Deactivate module using command

Open command line in root of Magento and run following commands via SSH using putty or others.

```
php bin/magento module:disable Milople_Magpie

php bin/magento module:disable Milople_All
```

b. Deactivate module using config.php

Open following file: app/etc/config.php
Replace **1** with **0** value in front of the following lines.
'Milople_All' => 0
'Milople_Magpie' => 0

c. Update the database
Open command line in root of Magento and run following command via SSH using putty or others.
```
php bin/magento setup:upgrade
```

3. Remove extension from your store permanently

a. Deactivate module using command

Open command line in root of Magento and run following command via SSH using putty or others.

```
php bin/magento module:disable Milople_Magpie
php bin/magento module:disable Milople_All
```

b. Delete the below mentioned folders and files

app/code/Milople/Magpie
app/code/Milople/All

c. Update the database
Open command line in root of Magento and run following command via SSH using putty or others.

```
php bin/magento setup:upgrade
```

- ✓ Refresh the cache from admin panel
- ✓ If you find something wrong and unable to access the Admin Panel, then delete the following folders from your Magento store.

  var/cache

  var/session

- ✓ If you want to refresh Cache via SSH
- ✓ Open command line in root of Magento and run following commands via SSH using putty or others.

```
php bin/magento cache:clean

php bin/magento cache:flush
```
