Order Notifier Extension for Magento 2

1. Installation

- Get Order notifier extension from Milople Magento 2 extension store
- Unzip the extension and copy the folder structure in your store.
- Create a directory called "code" if you are installing the first extension inside the "app" directory then create the "Milople" directory inside the code and paste the folder structure from the module to that directory

So, your folder structure will be like following

```
app/code/Milople
```

a. Activation

open a command line in folder root of Magento and run following commands via SSH using putty or others,

```
php bin/magento module:enable Milople_All
php bin/magento module:enable
Milople_Productsort php bin/magento
setup:upgrade
```

2. Uninstallation and urgent deactivation

a. Deactivate module using command

Open command line in the root of Magento and run following commands via SSH using putty or others.

```
php bin/magento module:disable

Milople_Productsort php bin/magento

module:disable Milople_All
```

b. Deactivate module using config.php

Open the following file: app/etc/config.ph

Replace **1** with **0** value in front of the following lines.

```
'Milople_All' => 0
'Milople_OrderNotifier' => 0
```

c. Update the database

Open the command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento setup:upgrade
```

3. Remove an extension from your store permanently

a. Deactivate module using command

Open command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento module:disable
Milople_Productsort php bin/magento
module:disable Milople_All
```

b. Delete the below-mentioned folders and files

```
app/code/Milople/Produtsor
t app/code/Milople/All
```

c. Update the database

Open command line in the root of Magento and run the following command via SSH using putty or others.

```
php bin/magento setup:upgrade
```
