

1. Introduction

The Customer & Order Attribute extension for Magento 2 allows managing customer and order with ease. As a result, increase customer experience, streamline operations and make data-driven decisions easily.

2. General Configuration

After buying the extension, you can configure it by navigating here through the Magento backend.

You can access your serial key from “My Account” dashboard and enter it here to activate the extension.

The status functionality can enable or disable the Magento 2 Order & Customer Attribute extension from here.

The screenshot shows a configuration page for 'MILOPLE EXTENSIONS'. At the top, there is a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. On the left, a sidebar lists various configuration categories: GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, MILOPLE EXTENSIONS (highlighted), Order And Customer Attribute, and SERVICES. The main content area is titled 'General' and contains two settings: 'Enable [store view]' with a dropdown menu currently set to 'Yes', and 'Serial Key [global]' with an empty text input field. Two orange callout boxes provide instructions: one points to the 'Enable' dropdown with the text 'Select yes to enable the extension from the backend', and the other points to the 'Serial Key' input field with the text 'Enter the serial key to activate the module'.

3. Customer Attributes

In the Customer attribute section, you will find the “Add New Attribute” button. You can click on the button to add a new customer attribute.

3.1 New Customer Attribute - Attribute Properties

The admin can enter the attribute name. It will be showcased while entering the data. It is a required field and so, you are not allowed to leave it blank.

The admin can choose the input type from multiple other options. It includes drop-down, multiple-select, multiple-select with image, single select with image etc.

The admin can set yes to enter the value. On selecting no, you are not allowed to enter the required value.

The screenshot shows the 'New Customer Attribute' page. At the top, there is a search icon, a notification bell with a '2' badge, and a user profile 'admin123'. Below this is a navigation bar with buttons for 'Back', 'Reset', 'Save and Continue Edit', and 'Save Attribute'. On the left, a sidebar under 'ATTRIBUTE INFORMATION' contains 'Properties', 'Manage Labels', and 'Storefront Properties'. The main area is titled 'Attribute Properties' and contains three fields: 'Default Label' with a red asterisk and a callout 'Enter the name of the attributes that you want to display'; 'Customer Input Type for Store Owner' with a dropdown menu set to 'Text Field' and a callout 'Select the input type'; and 'Values Required' with a dropdown menu set to 'No' and a callout 'Set yes to enter the required value'.

3.1.1 New Customer Attribute - Advanced Attribute Properties

The admin can enter the attribute code. The field is used internally and ensures that you avoid using spaces or should not be more than 30 symbols.

Allows admin to enter the value for the default value field. The value will be displayed along with the attributes.

Option to choose the input validation type. The field is visible only when the input type is set as a text field.

The admin can select yes to display an attribute in the frontend.
